

Rice Quality Analysis Report

Generated: 25/4/2026, 7:26:15 am

Job Details

Job ID: dca0e77a-798f-4fce-ae51-88381cb7edd5
Region: Karnataka
Status: COMPLETED
Request Type: predict
File Count: 1
Created At: 25/4/2026, 7:25:58 am

Analysis Summary

Rice Type: BD39
Total Grains: 12
Healthy Grains: 9
Unhealthy Grains: 3
Health Score: 75%
Quality Grade: Rice Processing Industry (milling/parboiling)
Market Price: ₹15,010 / 1000 kg
Shelf Life: 24 days (process within weeks — ICAR-NRRI high-risk grade)
Supply Chain: Rice Processing Industry (milling/parboiling)
Health Breakdown:
• broken high: 1 grains (8%)
• discoloured high: 2 grains (17%)
• insect infected: 1 grains (8%)
• unhulled: 8 grains (67%)

Healthy 75% — 75%
Unhealthy 25% — 25%

Health Distribution

broken high (8%) — 8%
discoloured high (17%) — 17%
insect infected (8%) — 8%
unhulled (67%) — 67%

AI Storage & Handling Advice (LangChain / Ollama)

Here are the answers based strictly on the provided data:

****1. Quality Assessment:****

The health distribution for this batch of BD39 rice from Karnataka indicates:

* Unhulled: 8 grains (67% of total)

* Discoloured high: 2 grains (17%)

* Insect infected: 1 grain (8%)

* Broken high: 1 grain (8%)

This mix of defects affects the overall quality and edibility of the rice, making it suitable for processing rather than direct consumption.

****2. Supply Chain:****

Given the health percentage of 75.0%, this batch belongs in the recommended supply chain "Rice Processing Industry (milling/parboiling)" as its defects are more suitable for processing into various rice products.

****3. Shelf Life:****

The estimated shelf life of 24 days is due to the presence of insect-infected grains, which can lead to contamination and spoilage if not processed promptly. Following ICAR-NRRI high-risk grade guidelines ensures the batch is processed within a reasonable timeframe.

****4. Market Price Justification:****

This batch fetches Rs.15.01/kg in Karnataka due to its relatively good quality (75.0% healthy grains) and suitability for processing into various products, making it valuable for industries.

****5. Storage Instructions:****

- * Store the rice in a dry, well-ventilated area to prevent moisture accumulation.
- * Keep the rice away from direct sunlight and heat sources.
- * Check the rice regularly for signs of insect infestation or spoilage.
- * Consider processing the rice within 24 days as recommended by ICAR-NRRI high-risk grade guidelines.

****6. Farmer Summary:****
This batch of BD39 rice from Karnataka has a mix of defects, with unhulled and discoloured high grains dominating the health distribution. While not suitable for direct consumption, its quality makes it valuable for processing into various products.
